

Teaches. Answers. Rehearses. The AI trainer for pharma field forces.

Your field force is your biggest commercial investment. Visits get counted, sales get reported, but no report tells you how prepared a rep was walking into the HCP's office. At launch the gap gets expensive: a team still learning the message spends the product's most critical months learning on the job. Those months don't come back.

reTrain • WHAT IT DOES

reTrain gets your field force ready for the HCP. Every step measured.

Training, everyday support and rehearsal in one product. Reps learn from approved content, ask the assistant anytime, rehearse before the visit. Everything is measured; progress becomes reports.

reTrain • LIVE REHEARSAL WITH AN AI AVATAR HCP

● Academy

Approved content in one place, auto-assigned to each rep by knowledge level. Short modules, quiz-based scoring, progress on a single screen. Learning is never left to chance.

● 24/7 Assistant

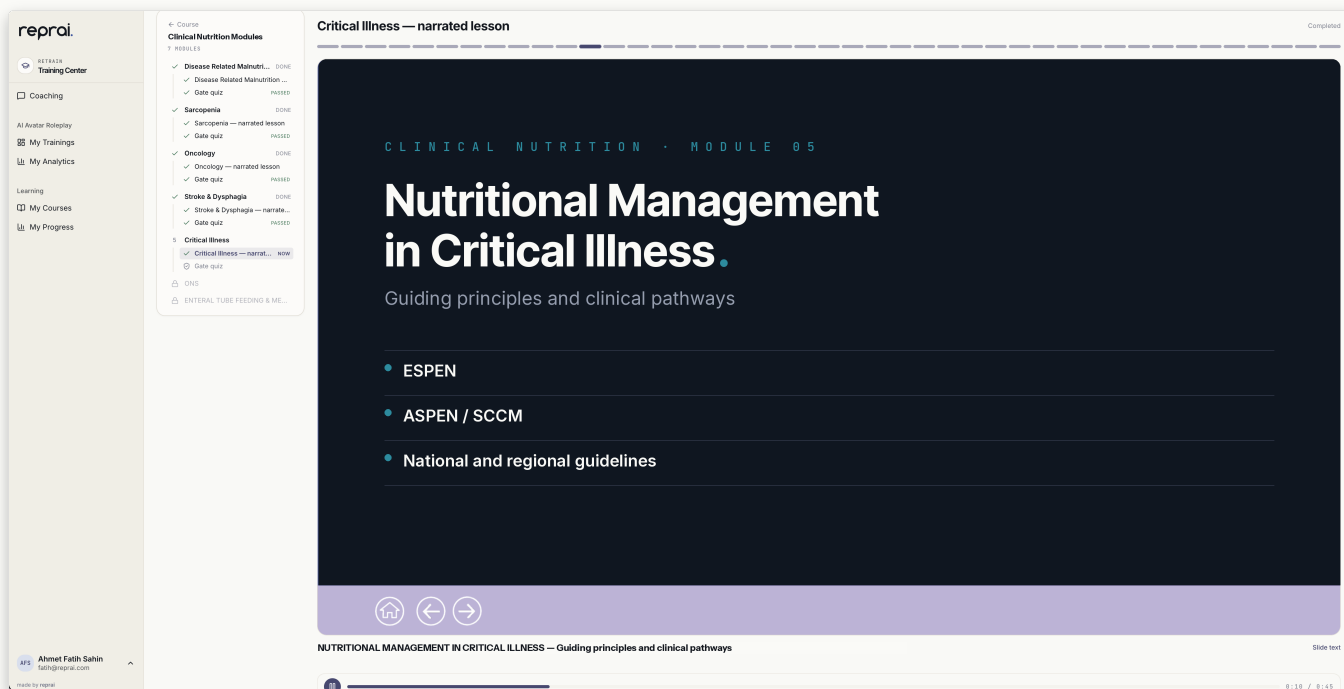

An assistant that keeps no office hours, on the rep's tablet. A final run-through before the visit; every product question answered instantly, from approved content. No one goes into the field alone.

● Visit Rehearsal

An AI avatar plays the HCP. It objects, pushes back, and is not easily convinced. The rep sweats, sees the score, tries again; no two runs are the same. The real visit gets their best.

AT LAUNCH

The new product's message goes into the Academy as a module, the AI avatar raises its objections, and reps rehearse without limit until launch day. Readiness is a score, not a guess.

reTrain · THE ACADEMY — A NARRATED LESSON WITH GATE QUIZZES

ABOUT reprai

Built for pharma companies.

reprai is an AI system for pharma's commercial and medical operations. reMarket reads the market, reFlect writes medical content, reRep runs HCP communication, reTwin puts the expert on screen, reTrain gets the team ready for the visit.

GETTING STARTED

Let's run the first rehearsal together.

LIVE DEMO

You present your product. An AI avatar plays the HCP and pushes back.

PILOT

If you like it, we start contained: one team, one product.
